

**FIVE OR MORE APPEARANCES
IN THE OLYMPIC GAMES**

1992 Revision

by Lennart Dahllöf (†), Wolf Lyberg, and Bill Mallon

The following is an update of information originally compiled by the late Swedish Olympic historian Lennart Dahllöf. In *SOF-Bulletinen Special #3*, Dahllöf presented the first ever list of Olympic athletes who had competed in four or more Olympic Games. After his death, the statistics were revised to include the 1988 Olympic Games. The following is an updated version which includes the 1992 Olympics and uses data compiled for the 1992 Olympics by Wolf Lyberg (SWE). Because of size constraints, only those athletes competing in five (5) or more Olympics is presented, although we have the data for all those competing in four (4) or more Olympics.

In the main list, abbreviations are used for the sports and nations. The national abbreviations are the standard three-letter IOC ones. The sport abbreviations are of my own (BM) design but are fairly obvious for the name of the sport in English. After the main lists are given lists by sports and nations. These do not contain the same detail as to years competing as the main list, but by referring back to the main list that information can be obtained. Finally a list of the first athletes to appear in five or more Olympics is also given.

FIRST TO APPEAR RECORDS

Records are given, where applicable, for the first person to compete in each category. Separate lists above the underline include the record if one elects to not include the Intercalated Olympics of 1906 or, for the Winter Olympics, the separate figure skating events held in 1920. Separate lists are given for women and for winter sports.
